

<b>Herman Bergwerf</b>	hbergwerf.nl	post@hbergwerf.nl
Experience	<b>Backend Engineer</b> Omoda Mar 2022 – Jul 2022 Remote	Responsible for researching novel machine learning techniques and implementing an image processing codebase in Python. We developed a fully automated pipeline for editing, cropping, and selecting photos from the photography studio of Omoda.
	<b>Software Engineer</b> CreativeQuantum Aug 2017 – Dec 2021 Berlin, Germany	Lead designer and developer of a new, web-based chemical sketching program for the <i>webChem</i> platform. Using the Dart language I designed a modular event handling system and a top-notch rendering mechanism for chemical structures.
	<b>Full Stack Developer</b> Learnbeat Jan 2017 – Jun 2018 Leiden, Netherlands	I was asked to implement a chemical sketching program based on MolView.org in <i>Learnbeat</i> , which is used for digital education by over 500 highschools in the Netherlands.
	<b>Software Engineer</b> Profects Aug 2014 – Dec 2016 Kappelle, Netherlands	At Profects I helped to develop a microservice architecture for new projects based on Docker and Golang. One of our projects involved an email scheduler that sends thousands of customized pricelists to customers of <i>Adri&amp;Zoon</i> to this day.
Education	<b>Radboud University</b> MSc. <i>Mathematical Foundations of Computer Science</i> 2019 – 2023	MFoCS follows a long-standing research tradition at RU in logical and mathematical foundations of computing science.  <b>Thesis:</b> <i>An Exploration of Graph Pebbling.</i>
	<b>Delft University of Technology</b> BSc. <i>Nanobiology</i> 2015 – 2019	Nanobiology is the study of the complexity of living systems. It employs the methods and principles of Physics to do this in a quantitative way.  <b>Thesis:</b> <i>Nerve fiber tracing in brightfield images of human skin using deep learning.</i>
